Fig. 4.*Fig. 5.**Fig. 6.*

FIG. 1 is a front elevational view of a regulator panel for aircraft breathing equipment or the like, showing our new design;

FIG. 2 is a side elevational view thereof;

FIG. 3 is an end elevational view thereof;

FIG. 4 is a front elevational of a modified embodiment of the regulator console panel disclosed in FIG. 1;

FIG. 5 is a side elevational view thereof; and

FIG. 6 is an end elevational view thereof.

The sides not shown are mirror images of the sides shown in FIGS. 2 and 5, respectively, and the ends not shown are substantially mirror images of the ends shown in FIGS. 3 and 6, respectively.

The dominant features of our design reside in the portions shown in full lines.

This is a continuation-in-part of design application Ser. No. D. 79,177, filed March 25, 1964, and now abandoned.

We claim:

The ornamental design for a regulator panel for aircraft breathing equipment or the like, substantially as shown and described.
